## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 1-19 and 33-37 drawn to a method of polymorphism-based drug candidate design, classified in class 702, subclass 27.
2. Claims 20-22, drawn to a method of polymorphism-based drug therapy selection, classified in class 702, subclass 27.
3. Claim 23, drawn to a method of polymorphism-based clinical prognosis prediction, classified in class 702, subclass 27.
4. Claim 24, drawn to a method of polymorphism-based drug design against drug-resistant targets, classified in class 702, subclass 27.
5. Claim 25, drawn to a method of identification of compensatory mutations, classified in class 702, subclass 27.
6. Claims 26-32 and 38-40, drawn to a method of making a polymorphism database and computer systems comprising a polymorphism database, classified in class 702, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Inventions 1-6 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different methods with different steps that produce different results.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group 1-6 are not coextensive, as a result of the differences in the scope of the claimed methods, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

For Invention 1, the species are protease targets (claims 33 and 34), reverse transcriptase targets (claims 33, 34, and 35), an HIV enzyme (claims 33, 36, and 37).

For Invention 6, the species are cell surface targets (claim 39), protease targets (claims 39 and 40), and polymerase targets (claims 39 and 40).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, for Invention 1, claims 1-19 are generic. For Invention 6, claims 26-32 and 38 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Stephanie L. Seidman on 14 January 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
